Agenda: Review and finalization of (1) course structure - R17 (2) Syllabus of I and II year specifically that of core EEE subjects

Introductory remarks and presentation:

- Dr. VSK Reddy has welcomed the members of the board of studies for its first meeting pertaining to the review of R-17 EEE course. He has given a briefing on the college, its academics, and achievements and about the newly introduced EEE course.
- Prof. K Subhas has introduced the other faculty members to the external Board members and outlined the methodology of the preparation of the course structure and the syllabus.
- Dr. S Srinivasa Rao has made a presentation covering the following.
 - Course structure for all the Four years with year /semester wise break up, details of credits, laboratory classes, tutorials etc.
 - Syllabus of subjects of I and II years
 - Percentage wise distribution of subjects among Core engineering, Inter disciplinary engineering and Humanities & Sciences.

After a detailed review, discussion and getting all the required clarifications the Board has given the following recommendations:

- Electromagnetic fields (EMF) should be moved from II-I to II-II and in lieu, Network Theory should be moved from II-II to II-I
 - *Accepted and will be implemented*

- Dr. Mohan Rao suggested introducing Strength of materials and Fluid Mechanics as a subject in place of science subjects like engineering physics.
 - *It was clarified by Prof. Subhas that these topics are covered to some extent in the Subject 'Basics of Mechanical engineering' and effort will be made to give broader coverage by adjusting the syllabus of other subjects suitably.*
- Dr. Raghuram wanted us to ensure that for all the elective subjects the required basic background has been touched upon in the earlier syllabus/subjects. For e.g. Power system stability concepts should have been covered in the related subjects earlier.
 - *Mostly, this aspect has been taken care of. However it will be reviewed again and implemented.*
- The topic 'Duality' to be introduced in the subject "Electrical Circuits" unit-2 , Network Analysis
 - *Will be implemented*
- For all subjects the number of recommended text books should be limited to two and it should be ensured that the entire syllabus is covered in them. However reference books can be more to give elaborate coverage. In particular :
 - EM-1: "Principles of Electrical Machines" by VK Mehta, Rohit Mehta to be moved in to Reference books.
 - EMF: In reference books Schaum's out line series book to be added.
 - Control Systems: "Control Systems Engineering" by A Nagoor Kani to be moved in to Reference books.
 - EM-2: "Electric Machinery" by AE Fitzgerald.... to be moved in to Reference books.
 - EPGTAD:-1: "A text book on Power system engineering" By ML Soni Gupta ... to be moved in to Reference books.
 - STLD: "Switching Theory and Logic Design" by A Anand Kumar to be moved in to Reference books.
 - *Will be implemented*
- Network Theory (II-II) :
 - The topics *Locus Diagrams & Resonance* should be moved from unit- IV and merged into unit-III and the title to be changed as Single & Three Phase circuits.
 - In lieu, the topic *Filters & Attenuators* should be included as unit- IV
 - *Will be implemented*
- For newly introduced subjects like 'High Energy Storage Systems 'and 'Photo Voltaic (PV) Systems it should be ensured that at least one standard text book is available with complete syllabus coverage.
