

**MALLA REDDY COLLEGE OF ENGINEERING & TECHNOLOGY**

**(Autonomous Institution – UGC, Govt. of India)**

**A brief report on “C MINI PROJECTS” workshop organized by the  
Department of Computer Science and Engineering for I BTech CSE Students**

**22/01/2018 & 23/01/2018**

The Department of Computer Science and Engineering is one of the most well established departments in the discipline of engineering. The CSE Department at MRCET is much organized. The aim is to impart education of the highest quality to the young minds, imbue them with specialized training, provide opportunities for innovation and research, and inspire them to be knowledgeable, professional, and competent.

Here @ **MRCET, Department of Computer Science and Engineering** had taken the initiative of conducting a workshop on “**C mini projects**” exclusively for the **first year students of CSE**. They too showed a great interest as it provides an opportunity to pad up their skill-set by practical implementation of their theoretical knowledge leading to creative ideas.

**Dr. D Sujatha, HOD, Department of CSE, MRCET** formally welcomed all the participants and addressed the importance of workshop. She added that the world is especially for those engineers who can be more creative and crack the technical or practical problems that arise. Resolving the industry issues is what makes them a good engineer!

Technical skills can only be improved by doing mini projects. So students should utilize mini projects well, so that they will become more productive. It is noteworthy that this very basic knowledge is required even at the end of their course where they appear for technical interviews in placement drives.
