

Report on Two Days workshop

“Application Development using React-Native”

A two days workshop on “**Application Development using React-Native**” was organized by the department of CSE for second years from 9th to 10th December 2022. More than 250 students has attend the workshop which was held at first floor CSE lab. The workshop was planned in such a way that students should be independent in exploring their coding skills with the current on going technologies and also to get informative apart from academic curriculum. The session was held with a hands on session so that students can get more demonstrative on what they learn.

Dr.S.Shanthi, HOD,CSE, MRCET, has well-advised the students to attend the workshop attentively and grab knowledge on java script which will help them to get benefited in their III year application development lab.

Schedule for the 2 Days of Workshop

Day1:

Introduction on Java Script: Variables, conditional statements,if-else,functions with hands on. Introduction on React: Components, installation of nodejs, Setup React Native with Expo CLI

Day2:

Building projects : On second day students develop a simple application like To-do list and simple calculator.

At the end of session students learn to develop a simple applications and they enlightened to submit a project on which they learned from the workshop.
