75th Independence Day-Drawing & Painting Activity Report

Department of Computer Science & Engineering in association with Institutions Innovation Council (IIC) has organized "**Drawing & Painting Activity**" on the celebration of 75th Independence Day which was conducted on 12th August 2022. Students and faculty members have exhibited their talent and innovation on their drawings. One hour of time period was given for this activity. Five faculties and 25 students has participated in the event.

Art and design stimulate creativity and imagination that demonstrate innovation in real time. It provides visual, tactile and sensory experiences and a special way of understanding and responding to the world. It enables students to communicate what they see, feel and think through the use of color, texture, form, pattern and different materials and processes. We plan the activities in art and design so that they build upon their innovation ideas and creativity in short period of time.

While we give students of all abilities opportunity to develop their skills, knowledge and understanding, we can observe their levels of thinking ability. As the event was organized on the occasion of Independence Day celebration, many students exhibit their drawing ideas on national leader and national flag which express their patriotism, also with different level of demonstrating ideas like saving earth, Krishna-radhe, religious, etc.
