Dr VSK REDDY
Director , MRCET

FOREWORD BY THE DIRECTOR

I would incorporate new ideas which depict adept nature of MRCET students am delighted to announce the release of the much-awaited M- Wave Magazine, a remarkable endeavor entirely driven and executed by our talented students. The M- Wave Magazine stands as a testament to the incredible creativity and hard work our students have poured into this project. It is a platform that showcases their diverse talents, innovative ideas, and insightful perspectives. With increasing competition across the world, it is now crucial to be exposed to practical applications. Investing time in finding out numerous alternatives to a problem space instead of one, is a step towards skill enhancement. Such analysis requires an innovative mind that can be developed when one is involved in creation of intricate works like " M- WAVE". The M- Wave Magazine is a canvas on which our students have painted their ideas, stories, and artistic expressions. It is a reflection of the diversity and dynamism that defines our institution. I'm delighted to see how a platform provided by MRCET is fully utilised by the student and faculty members. I further advise the students to keep exploring while always being enthusiastic about learning new things.

Regards,

Dr VSK Reddy,
Director

Dr. S Srinivasa Rao,
Principal, MRCET

FOREWORD BY THE PRINCIPAL

I am thrilled to introduce the latest endeavour undertaken by our talented students - the M- Wave Magazine. This publication is a labor of love and a showcase of their remarkable creativity and dedication. Education in MRCET will always reflect the confidence we have in our students' ability, and our aim to create an environment where challenges will be taken up by our students as opportunities. The M- Wave Magazine is a platform for our students to express themselves through their art, writing, photography, and more. Within its pages, you'll find a rich tapestry of stories, poems, articles, artwork, and much more, all crafted by the skillful hands and imaginative minds of our students. It's a reflection of the vibrant and dynamic community we have at our college. One of the steps to explore not only today's technical world but also innovative levels of a student is the implementation of "M- WAVE", the CSE department's sophisticated magazine. It's a testament to their diverse talents and the hard work they've put into this magazine. The magazine covers a wide range of sections which consists the details of various workshops, events, certification programmes, cultural programmes, sports activities conducted in MRCET including sublime articles and artforms submitted by creative students of CSE department. I appreciate the faculty and student committee to initialize and successfully implement "M- WAVE". Your encouragement and support mean the world to our young talents, motivating them to continue pushing the boundaries of creativity. From the past few years, editions of "M- WAVE" emphasized the standards of the department and its students. Hoping this new edition of magazine would incorporate new ideas which depict adept nature of MRCET students.

Regards,
Dr. S Srinivasa
Rao, Principal.

**Dr. Shanthi,
Head of Department - CSE**

FOREWORD BY THE HOD

I believe that educational institutions should not only impart knowledge to the students but also allow them to expand their creative capabilities and showcase them to the world. M- WAVE is one such stepping stone towards the creation of such an environment. This magazine puts forward various activities conducted by the department and also encourages the students and faculty members to explore their innate capabilities. It is great to see the efforts of faculty members and the students to bring up such a piece of work and it is also a proud moment for the department for taking up such steps towards the betterment of the students. I really hope that this magazine finds its way towards shaping the minds of the students in a way such that they succeed in every step of their life.

Regards
Dr S Shanthi,
Head Of the Department-CSE

ANNUAL DAY

The annual Day celebration provided an opportunity to acknowledge and appreciate the academic achievements of our students. It is an occasion of celebration, felicitation, feast and festivity when students present with their wonderful performances and also receive honors for their curricular and co-curricular achievements

The celebrations are addressed by the chairman of the institute, Ch Malla reddy garu, who emphasizes the students to inculcate the habit of research-oriented thinking and cultural events as well. The event began with a warm welcome address by our college principal, S Srinivas Rao, who set the tone for the day's festivities. The agenda included a diverse range of activities, including technical sessions, cultural performances, exhibitions, and awards ceremonies.

The cultural performances showcased incredible talents of our students, dance, music, and drama performances captivated the audience, cultural diversity within our college community

The event also witnessed the recognition of outstanding individuals. Faculty members, students, and alumni received awards for their exceptional contributions to the college and the engineering community. We express our heartfelt gratitude to our sponsors and partners whose generous support made this event possible. Prizes will be distributed for the class toppers of every department .

The Annual Day at college is more than just a celebration; it's a chance for the college community to come together, showcase their talents and achievements, and strengthen the bonds that make the institution a special place for learning and growth. It's a day filled with joy, reflection, and pride in being part of the college's tradition and legacy. Outstanding students, faculty members, and staff may receive awards and recognition for their achievements in academics, sports, cultural activities, and other areas. This is an opportunity to celebrate and acknowledge their contributions to the college. The Annual Day may also be a platform to celebrate academic achievements such as top performers, research publications, or academic excellence awards.

Annual Day at Malla Reddy college of Engineering and Technology not only celebrated our engineering heritage but also looked ahead to the promising future of engineering education and practice. It served as a reminder of our commitment to excellence and innovation

A Techno Cultural Fest

ESPIRITO - 20 23

“ ESPIRITO “,the most awaited tech fest which will be held for two days. many interesting events are conducted by the department. the first day is the technical day where the technical events like code debugging, technical quiz, blind coding ,paper presentation, poster presentation and etc. are conducted. the second day is the cultural day where events like logo pogo , theme costumes, signature step, photography, slow cycling, Lan gaming and etc. are been conducted . our department has conducted a unique department event which is “ Instagram reels” .all the students whoever participated in the events where awarded with participation certificates as well as the winners were given the pizes for the events

NOVATO

FRESHERS' DAY AT COLLEGE A MEMORABLE BEGINNING

The very purpose of the Fresher's day party is to welcome new comers in a friendly atmosphere and avoid social evils, to encourage their creative impulses to boost their confidence. It is the day where seniors and juniors finally bond and unite to celebrate being part of the college. The events began with a lot of zest and joy which included games, singing, dance, fashion show and finally the stage was set for the fresher's to showcase their talent and compete for the Mr. and Ms. Fresher's crown.

This day is filled with excitement, anticipation, and enthusiasm as students embark on a new adventure of learning and personal growth. Freshers' Day celebrations are incomplete without cultural performances. Students showcase their talents through dance, music, drama, and other artistic expressions.

These performances not only entertain but also reflect the diverse and vibrant culture of the college community. It's a time for students to exhibit their creativity and for the audience to appreciate the talents of most memorable aspects of Freshers' Day is the interaction with senior students.

and innovation

'R' PROGRAMMING

DAY-1

RESOURCE PERSON

NAGA SRI MOULI BORUSU

-An Industry Expert

DAY-2

R programming workshop was conducted on 29th & 30th September 2023 by Mr. Naga Sri Mouli Borusu, a speaker, Industry Expert and a very well knowledge resource person in the field of Data Science and Machine Learning. The main objective of this workshop was to make aware the students of one of the latest technologies, R Programming which is not part of their curriculum. As R Programming has become one of the most prominent and in demand programming language, this workshop was planned to give students sufficient knowledge and technicality which may prove to be more beneficial and fruitful for them during their respective career path. The venue for the workshop is at Von Neumann lab at CSE department. The workshop was conducted from 9.30 am to 4.00 pm for two days. Around 135 students of third year have participated and got benefited.

The workshop started with formal inauguration where Dr.S.Shanthi, HOD of CSE, welcomes the resource person, Dr.S.Srinivasa Rao , Principal of MRCET , Dr.T.Venugopal, Dean, and students. Dr.S.Shanthi, HOD of CSE, insisted students to use the opportunity in developing their skills and knowledge on R Programming. Dr.S.Srinivasa Rao , Principal of MRCET, addressed students to be attentive and grab the knowledge. Dr.T.Venugopal, Dean of MRCET, facilitate the students with the current ongoing opportunities and technologies

International Conference 2023

International Conference ICSCSP-2023

Malla Reddy College of Engineering & Technology has successfully hosted its 6th International Conference on “Soft Computing and Signal Processing” by the Department of CSE,IT,AI ML and ET on 23rd and 24th June 2023. The inaugural ceremony was started by lighting the lamp followed by an invocation song. The guest of honor was welcomed with a traditional dance by our MRCET students.

The auditorium was occupied by the eminent personality- Guests of honors : Prof.Naeem MS Hanoon, MARA, Malaysia, Prof.Siba K Udgata, HCU, Hyderabad, Prof.Suresh Chandra Satapathy, Dean R&D, KIIT, Bhubaneswar, Dr.VSKReddy, Director, MRCET, Dr.S.Srinivasa Rao, Principal, MRCET, Prof.P.Sanjeeva Reddy, Dean of international studies and Organizing Secretary of 6 th International Conference, Dr.T.Venugopal, Dean of students welfare, MRCET and all the department Head's. A huge number of scholars from various countries presented their research articles during these two days and their research papers are selected in SPRINGER for publication. The Souvenir has been launched by all the dignitaries on the dais to make this event a memorable one for MRCET.

Graduation Day

The Graduation Day was held on June 15th 2023, at Malla Reddy College of Engg & Technology in the Main Auditorium at 10:30 am. Around 800 graduates with their parents attended the ceremony to celebrate their success on achieving their B.Tech degree. In Computer Science and Engineering around 230 got graduated on first attempt among 260 which was a greatest achievement among all other passed out.

The Hon'ble Chief Guest of the programme was Sri. Ch. Malla Reddy, Hon'ble member of Legislative Assembly(MLA), Founder Chairman(MGRI) presided over the function and delivered the presidential address. The other prominent dignitaries on the Dias are: Dr.VSK Reddy, Director, MRCET, Dr. S. Srinivasa Rao, Principal, Dr. T.Venugopal, Dean of students welfare, Dr. S.Shanthi, HOD-CSE and all other department HOD'S. The program has started with an Invocation song followed by Lighting of lamp by the dignitaries.

Campus Recruitment Training (CRT)

A Six days CRT classes was held at MRCET, CSE from 05 TH June TO 10 TH June 2023 in Offline mode, which was conducted by Logik works. 211 students of CSE IV th B.Tech students attended these classes. The intention of this training program was to improve the Concord, Interview skills, Being Alpha, Brand Elevator, Articles, Voices, The Insider, Black and White, Races, Boats and Streams, Time and Work, Piper and Cisterns, Man days and Wages, Critical Reasoning, Idioms, Permutations And Combinations, Probability are the non Technical Skills and Introduction, Object Oriented Programming concepts, Searching Techniques, Sorting Techniques, Linked lists are the Technical skills to student to get placement. Venkat, Savithri, Prabhakar are the trainers from the Logik works. Mr.Naveen, Mr.Tariq, Dr.VSR Murthy, Dr.Himabindu, Mrs.Swapna, Mr.Anjaneyulu, Mr.Temozion, Ms.Kavya, Ms.Vijayalakshmi, Mrs.Rajasri are the trainers from the MRCET.

The topics covered in the CRT training program:

Day 1:

Concord, Interview skills, Being Alpha, Brand Elevator

Day 2:

Articles, Voices, the Insider, Black and White

Day 3:

Races, Boats and Streams, Object Oriented Programming concepts

Day 4:

Time and Work, Piper and Cisterns, Man days and Wages, Introduction Searching Techniques

Day 5:

Critical Reasoning, Idioms, Searching Techniques, Sorting Techniques

Day 6:

Permutations and Combinations, Probability, Linked lists

The CRT Training Program was interactive among the students and the trainers which made the students well trained. Also they were provided with work sheets where they practiced on the concern topics after the session was conducted.

FLASH MOB-2023

“Engineer’s day” Celebration

**MALLA REDDY COLLEGE OF ENGINEERING &
TECHNOLOGY**

DEPARTMENT OF COMPUTER SCIENCE ENGINEERING

On the occasion of Birth Anniversary of India’s most prominent engineer Dr. Moksha Gundam Vishweshvaraya, we celebrate Engineers’ day in his remembrance of their remarkable works in engineering field. On 15th September 2023 @ MRCET the Engineers Day celebration was organized by the department of Computer Science and engineering. The event was planned in such a way that students can involve themselves in exhibiting their talents as an engineer in all aspects.

ENGINEER'S DAY CELEBRATION(DRAWING)

ARTIFICIAL INTELLIGENCE

VS

YOU

Is AI making us doubt our capabilities and opportunities in the market today? Or are we just OVERTHINKING it? How can something created by man himself make us get to such a question? Let us find out.

- A. Steffanie Grace II CSE-A

WHY? *The Cause*

There are 2 possible answers to these questions:

1. We can't stop experimenting and creating
2. We are over dependent on technology.

While both answers can find no stop to whatsoever, the urge of man to keep creating would eventually find an end when AI would ultimately take over. And we all are wondering how AI would take over. Lets's take a quick look at the 2nd conclusion we came down to. "We've become too dependent." Every task we do, we look out for solutions. If you give it a deep thought on "How we get our answers?" You have your answer right there. AI is all we look to.

HOW? *The Threats*

Artificial intelligence has the potential to make lives easier by understanding human desires but if it were uncontrolled, the technology could pose a serious threat to society. We all know how the tools of AI have their limitations, and AI is still far from replicating the unique skills, insights, and creativity that humans possess. But we humans have got to a point where we are using AI for the most basic things today. Jobs in the market today like customer service representatives, computer programmers, research analysts, financial traders, graphic designing, content writing and so many more could possibly be replaced by artificial intelligence in the coming days.

ANSWERS. *The Solution*

**FOR THE QUESTIONS
WE CAME UP WITH,
WE HAVE TWO
ANSWERS. LET US
LOOK AT THEM.**

1. STOP BEING DEPENDENT.

There are Certain skills that AI can not replace, two of them being Creativity and Critical thinking. At first glance, it might seem like AI can be as creative as any person. But it's important to remember that most AI programs simply manipulate the already existing data that they have been trained out. New thinking is something AI lacks so working on being creative is important, as for now, creativity and critical thinking remain as exclusive human skills.

2. USE AI IN THE RIGHT WAY and DEVELOP NEW SKILLS.

While we all are equally worried to see where AI would take over, here are 5 strategies to tackle this fear and become less vulnerable to these changes:

1. Develop skills that are difficult to automate by AI.
2. Embrace new Technology.
3. Learn new skills and upskill to match high demand roles.
4. Focus on constant learning.
5. Learn to Imagine and visualize.

In short, if you're worried that your job might be outsourced to technology one fine day, the best thing you can do right now is to work on your soft skills. Work on communication, strategic thinking, problem-solving, empathy, and creativity. It might eventually save your career from being taken over by bots, and even get you a pay rise in the near future. So make the right choices and use AI in the right way to stop it from taking over you.

UNLOCK YOUR FULL POTENTIAL

The Science of Personal Growth

Studies have shown that grit is a better predictor of success than factors like talent or intelligence. When you approach your goals with grit, you're more likely to overcome obstacles, push through difficulties, and ultimately achieve what you set out to do.

"Unveiling the Scientific Secrets of Personal Growth"

In the grand tapestry of life, personal growth is the thread that weaves the story of our evolution. It's the relentless pursuit of becoming the best version of ourselves, a journey guided by the compass of self-discovery and the lantern of continuous improvement. What if I told you that personal growth is not merely a philosophical ideal but a scientific reality? Welcome to the realm of "The Science of Personal Growth.

Positive psychology is another cornerstone of the science of personal growth. Unlike traditional psychology, which often focuses on dysfunction and mental illness, positive psychology seeks to understand and promote the positive aspects of human experience, such as happiness, well-being, and personal strengths.

"It does not matter how slowly you go as long as you do not stop"

"Your Path to Becoming the Best Version of Yourself"

The Brain's Remarkable Adaptability

At the heart of personal growth lies the remarkable phenomenon known as neuroplasticity. The human brain, once believed to be a static organ, has revealed its astonishing ability to rewire and reorganize itself in response to learning and experience.

The Secret Sauce of Achievement

Angela Duckworth's concept of grit has become a pivotal element in the science of personal growth. Grit is the combination of passion and perseverance toward long-term goals. It's the ability to stay committed to a task or objective, even in the face of challenges and setbacks. Studies have shown that grit is a better predictor of success than factors like talent or intelligence.

When you approach your goals with grit, you're more likely to overcome obstacles, push through difficulties, and ultimately achieve what you set out to do. It's a reminder that personal growth is not solely about innate abilities but also about your determination and perseverance. By incorporating these practices into your life, you can actively promote your own personal growth and happiness.

The Path Forward

- ◆ Set Clear Goals.
- ◆ Embrace Lifelong Learning.
- ◆ Step Out of Your Comfort Zone.
- ◆ Practice Mindfulness.
- ◆ Build a Support Network.
- ◆ Embrace Failure.
- ◆ Celebrate Small Wins.

Personal growth is not a vague concept; it's a scientific reality rooted in the brain's adaptability, the principles of positive psychology, and the power of grit. By understanding the science of personal growth and applying these principles to your life, you can embark on a journey of continuous self-improvement, unlocking your full potential and becoming the best version of yourself.

“Success is not the key to happiness. Happiness is the key to success. If you love what you are doing, you will be successful”

The power of

Student organisations

While many college brochures and prospectuses focus on rankings, accreditations, program content and curriculum, it can be a lot harder to find out more about the various student societies, clubs and organizations available to students. In recent years, student societies, clubs and organizations have garnered real prominence within business college education. From sport and recreation clubs, to art, culture and theatre groups, community service societies to student government, they all help shape the business college experience for millions of students worldwide and are an opportunity for students to better their professional and personal growth.

Although the idea of joining a student society, club or organization might not be a priority during your first week of the semester, you still might want to take your time to look around and see if there are any societies, clubs or organizations that take your interest.

Join an organization!!

Meet and make friends with like- minded individuals during your studies you'll meet people in your lectures and your student residence, but there can be no guarantees you'll find people with the same interests and hobbies as you without signing up for clubs or societies. What's more, your ability to network without any conscious effort will improve as well. Depending on which society or club you're a part of, you might find yourself in a position where you're able to make. The majority of student societies, clubs and organizations are chaired by students, who manage and oversee the internal and external activities and events that happen, as well as the funding and allocation of resources and facilities. Each year, students have the opportunity to be elected by their peers to run for committee roles, such as president, vice president, treasurer, raising and giving secretary, wellbeing officer – every role can offer a real sense of achievement.

It's also where you can improve your experience and knowledge of valuable professional skills such as event planning and organization, market research, budgeting – all of which employers seriously value and can help set you up nicely for exciting positions later in life. You'll get out of your comfort zone, having the courage to take that first step and put yourself out there is pretty admirable.

TURNING SETBACKS TO COMEBACKS

“Don't let setbacks define you, let them refine you for a powerful comeback.” Life as a student is a journey filled with highs and lows. Along the way, setbacks are almost inevitable. However, the ability to turn these setbacks into comebacks is a valuable skill that can lead to personal growth, resilience, and success.

The first step in overcoming setbacks is to acknowledge your emotions. It's okay to feel disappointed, frustrated, or even defeated. Allow yourself to process these emotions without judgment. Recognizing how you feel is the first step toward healing. Take a critical look at the setback and try to understand what led to it. Was it a lack of preparation, external factors beyond your control, or a combination of both? Understanding the root causes can help you avoid similar situations in the future.

Once you've analyzed the setback, set realistic and achievable goals for your comeback. Break down your larger goals into smaller, manageable steps. This approach can make the journey to recovery less daunting and more achievable. Every setback carries a lesson. Use setbacks as opportunities for growth and learning. Maintaining a positive mindset is essential for a successful comeback. Instead of dwelling on past failures, focus on your strengths and past achievements. Believe in your ability to overcome challenges. If setbacks are taking a toll on your mental health or well-being, don't hesitate to seek professional help. Colleges and universities often have counselling services

available to students. Your mental and emotional health should always be a priority. Recognize and celebrate your achievements, no matter how small they may seem. Each step forward is a victory on your comeback journey. Celebrating these wins can boost your confidence and motivation.

Setbacks are an inevitable part of life, especially for students who are navigating the complexities of education, personal development, and career goals. By acknowledging your feelings, seeking perspective, setting realistic goals, learning from your mistakes, and maintaining a positive and persistent mindset, you can turn setbacks into powerful comebacks. Each setback is an opportunity for growth, resilience, and ultimately, success. As you apply these strategies, you not only overcome challenges but also emerge stronger and better prepared for future.

**WORKING
ON
SKILLS**

**WORKING
FOR
GRADES**

“THE WORLD DOES NOT NEED ENGINEERING GRADUATES, IT NEEDS SKILLED ENGINEERS.”

Let's go eight years back, I was sitting in front the television, watching a man knocking every possible door to earn a minimum wage and prove to his father that he is a 'Skilled Engineer', But unfortunately, none of his trails were fruitful. Yes, It was Raghvaran B.Tech, the movie which made me realise that 'Engineering was never for me'. However,

LIFE IS ALWAYS CIRCULAR. WHAT GOES FORWARD, COMES BACK.

As I transitioned into high school, my father got me a computer. My interests changed from Cricket and Carrom to Computers and Science. I started spending my leisure hours with my computer in understanding the critical tasks it can account for. Meanwhile, joining copper wires and mixing solutions in the science lab. I realised that science and computers became an integral part of my life and I had questions like: "How is the colour coming out?", "What is running inside the computer?", which made me choose Engineering over other professional courses. Till date, If I hear the word Engineering, my mind will start tinkering about the yellow hat and some buildings left unconstructed in the back of my mind.

As I did my further research, I realised that there was "No perfect" branch. You can't debate between CSE and ECE. Engineering is not for the branch. It is a once in a lifetime experience which will help you in growing into a greater individual. An Engineer is a passionate hard worker, waking up at 5AM, managing his personal and professional life, travelling far away from home and studying the world's most complex subjects.

It was tough for me to choose between the digital oriented, world's favourite CSE, which led to many great outcomes in the country and ECE which helped the countries economy and people during recessions. Over everything, I chose Passion. The Passion for playing games on a computer and thinking of "How I am able to hit twenty people with a single click."

We cannot decide who is a skilled person based on his branch but can be selected based upon his skills. Every Engineer is a hustler and we cannot debate who is better based on the branch alone. We are here to learn new things, experiment with it and bring a change in society.

“MAYBE CARE A LITTLE MORE?”

- M Shraghvin IICSE-D

We all have that one close person who we always love having around. We constantly interact and sometimes also check things out with them.

Now imagine your mobile or PC in that place. How are they doing?

Anything draining them? Feeling “Lag”-ish?

Keeping our devices safe and clean increases their lifespan by lengths!! Hence giving you more value for the precious money you invested in your beloved device.

But where do you start? With random antivirus companies trying to trick you to get their expensive plans and your storage space getting consumed by social media apps.

Relax, you can use a few **basic solutions** to improve your device health!

IN A WORLD FULL OF SCAMMERS TRYING TO FILL UP JUNK, REGULAR CHECKUPS ARE A MUST!

FOR COMPUTERS

Cleaning out your computer's **junk** is necessary. One can use apps like **CCleaner, Atomic Cleaner** to get that free space.

Updating your **antivirus** frequently keeps your computer safe from the latest threats. Some recommended antivirus softwares are:

- **Bitdefender**
- **Norton**
- **ESET NOD32**
- **Antivirus McAfee**
- **Avira**

- PCMag and Antivirus Guide
2023

FOR MOBILES

Similarly clearing out **junk** from our mobile is also necessary. We can use applications like **Google Files** to get that task done and for **antiviruses**, we can use the similar ones from PCs.

Keeping your charge in between **20%- 80%** range is the best for **battery health**.

Closing or **stopping** unnecessary **background apps** prevents battery drain.

“

Contacting the customer support or visiting the servicing centre of your device's respective manufacturer is the **BEST** way to find the **safest solution** for regular maintenance or for solving issues.

”

Your mobile gifted by your dad or the laptop you always wanted so badly is always one of those special things you will own. But they don't have a mind of their own sooo.....

MAYBE CARE A LITTLE MORE?

“It’s not engineering, its the experience”

SHAIK AMEER SOHAIL,

Let's go eight years back, I was sitting in front the television, watching a man knocking every possible door to earn a minimum wage and prove his father that he is a 'Skilled Engineer', but unfortunately, none of his tries turned fruitful.

Yes, It was Raghuvaran B.Tech, the movie which made me realize that 'Engineering was never for me'. However, Life is always circular: what goes forward, comes back.

As I transitioned into high school, my father got me a computer. My interests changed from Cricket and Carrom to Computers and Science. I started spending my leisure hours with my computer in understanding the critical tasks it can account for. Meanwhile, joining copper wires and mixing solutions in the science lab. I realized that science and computers became an integral part of my life and I had questions like: "how's the colour coming out?" "what is running inside the computer?", which made me choose Engineering over other professional courses.

Til date, If I hear the word Engineering, my mind will start tinkering about the yellow hat and some buildings left unconstructed in the back

CLOSE YOUR EYES AND THINK OF
“ENGINEER”, THINKING OF
“YELLOW HAT?” GOT YOU.

What future ahead?, Is Mech so tough?, After 4 years am I be able to employ etc.

I did my further research, I realised that there was "no perfect" branch. You can't debate between CSE and ECE. Engineering is not for the branch it was for the onetime, onetime experience which will help you in growing into a greater individual.

“The world don’t need engineering graduates it need skilled engineers”

An Engineer is a passionate hard worker, waking up at 5AM, managing his personal and professional life, travelling far away from home and studying the world's complex subjects.

It was tough for me to choose between the digital oriented, world's favorite, CSE, which led to many great outcomes in the country and ECE, which helped the countries economy and people during recessions.

Over everything, I chose **Passion**, the passion for playing games on a computer and thinking of "how am I able to hit twenty people with a single click"

We cannot decide a skilled person based on his branch but can be separated based upon his skills. Every Engineer is a hustler and we cannot debate on one person from only one branch. We are

here to learn new things, experiment with it and bring the change in society.

VISION STATEMENT:

To acknowledge quality education and instill high patterns of discipline making the students technologically superior and ethically strong which involves the improvement in the quality of life in human race.

MISSION STATEMENT:

To achieve and impart holistic technical education using the best of infrastructure, outstanding technical and teaching expertise to establish the students into competent and confident engineers.

Evolving the center of excellence through creative and innovative teaching learning practices for promoting academic achievement to produce internationally accepted competitive and world class professionals.

Special Thanks

We extend our heartfelt gratitude to The Principal , Head Of The Department, and the faculty of CSE Department whose contributions made this college magazine a reality. It is through their dedication, creativity, and unwavering support that we have been able to showcase the vibrant talent within our Department
