10 CASE STUDY: MANAGING STRESS **[15M]**

1. Many organizations offer flex-time programmers that allow associates to choose when they come to work and when they depart. Such programmers can help alleviate work-family role conflict and thereby reduce stress.

2. A small manufacturing company held brainstorming sessions among its associates to uncover the cause of stress they were experiencing. The company used feedback from the meetings to change the nature of work rather than change how people responded. Changes included creating more realistic deadlines, generating more supervisory support and giving associates more involvement in making decisions related to matters affecting them.

Questions:

Q.1. Do you agree with flex-time programme? Do you see any disruptive effects of such strategy?

Q.2 To remove stress, which policy will you prefer – change the employee or change the workplace. Why?

Q.3 On what grounds do you justify the company's strategy in the second case?
