

**Report on “CSI Student Chapter” Inauguration at MRCET  
For the Departments of Information Technology (IT)**

The seed for Computer Society of India (CSI) was formed in 1965, and since then CSI has been instrumental in guiding the Indian IT industry down the right path. Today, the CSI has 72 chapters all over India, 511 student branches, and more than 100000 members including India's most famous IT industry leaders, brilliant scientists and dedicated academicians.

The **CSI Student Chapter** at **MRCET** for the departments of **IT** was inaugurated on 02/11/2019 by **Dr. V S K Reddy, Principal, MRCET** along **N. S. Gowri Ganesh, HOD, IT**. This occasion was graced by Mr G V Seshu Kumar, CSI Chairman, Hyderabad. After lighting the lamp, Dr. V S K Reddy, Principal, MRCET welcomed everybody and he stressed on the need for students to associate themselves with organizations like Computer Society of India.

Mr G V Seshu Kumar, CSI Chairman, Hyderabad and Global Head, Wipro for Virtual Desk spoke about the different activities of CSI. He stressed to organise various events related to CSI such as tutorials, seminars, conferences etc for the benefit of the student & faculty community.

Then Mr Prashant Sahoo, DevOps Engineer, certified Block Chain Expert and Scrum Master, TCS delivered a talk on “Block Chain Technology”. Blockchain owes its name to how it works and the manner in which it stores data, namely that the information is packaged into blocks, which link to form a chain with other blocks of similar information. Once the data is recorded in a block it cannot be altered without having to change every block that came after it, making it impossible to do so without it being seen by the other participants on the network.

The program was a grand success and paved way for many such endeavours in future.
