

MALLA REDDY COLLEGE OF ENGINEERING & TECHNOLOGY

(Autonomous Institution –UGC, Govt.of India)

(Affiliated to JNTU, Hyderabad, Approved by AICTE - Accredited by NBA & NAAC – 'A' Grade - ISO 9001:2015 Certified) Maisammaguda, Dhulapally, Komapally, Secunderabad-500100, Telangana State, India.

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Name of the Activity: MOODLE

Subject Name: JAVA, OS

Participants: II CSE

Moodle is a free, open-source Learning Management System (LMS) that can be used for a variety of purposes, including: Creating and managing eLearning L&D professionals can use Moodle to create, distribute, manage, and track eLearning. Moodle offers features for collaborative learning, such as web conferencing, forums, assignments, peer review, and self reflection, mobile learning .The Moodle app allows users to access content and submit activities and assignments on the go or offline.

About CSE – Computer Science & Engineering (Computational Intelligence)

MRCET offers a four-year under-graduate B.Tech course in Artificial Intelligence and Machine Learning which covers fundamentals of computer science courses along with necessary courses pertaining to AI and ML. It aims to develop a strong foundation by using the principles and technologies that consist of many facets of Artificial Intelligence including logic, knowledge representation, probabilistic models, and machine learning. This course is best suited for students seeking to build world-class expertise in Artificial Intelligence and Machine Learning and emerging technologies which help to stand in the crowd and grow careers in the upcoming technological era.

The course is designed to give the students enough exposure to the variety of applications that can be built using techniques covered under this program. They shall be able to apply AI/ML methods, techniques and tools to the applications. The students shall explore the practical components of developing AI apps and platforms.

ISO 9001:2015 CERTIFIED

JAVA R22 PROGRAMS

 1)a) Write a java program to find the Fibonacci series using recursive and non-recursive functions ☐

 b) Write a program to multiply two given matrices. ☐

 c) Write a program for Method overloading and Constructor overloading ☐

 2)a) Write a program to demonstrate execution of static blocks ,static variables & static methods. ☐

 b) Write a program to display the employee details using Scanner class ☐

 c) Write a program for sorting a given list of names in ascending order ☐

 3)a) Write a program to implement single inheritance ☐

 3)a) Write a program to implement Multi level inheritance ☐

 b) Write a program to implement Hierarchical Inheritance. ☐

 c) Write a program to implement method overriding. ☐

 4)a) Write a program to create an abstract class named Shape that contains two integers ☐

 b) Write a program to implement interface . ☐

 c) Write a program to implement constructor overloading ☐

 5 a)Write a program to create inner classes ☐

 b)Write a program to create user defined package and demonstrate various access modifiers ☐

 c) Write a program to demonstrate the use of super keywords. ☐

 d) Write a program to demonstrate the use of final keywords. ☐
